## Premier Quality

Premier Specialty Vehicles is the upper Midwest dealer for Horton Emergency Vehicles and American Emergency Vehicles (AEV), both leaders in their respective markets.

Choose **Horton Emergency Vehicles** if your buying decisions are based on quality and performance over price.

- Horton is the highest **quality** emergency vehicle on the market today. From the engineering to the fit and finish of the body and interiors, Horton quality is unsurpassed.
- Horton quality translates to more than a great environment to work in and a vehicle you can depend on. It also translates to **safety**.
- Horton also brings you more **technological innovations** than anyone in the industry.

If you are looking for a quality, dependable well-built ambulance to fit a mid-range budget, choose **American Emergency Vehicles (AEV)**.

- AEV completes extensive **safety** testing and incorporates tested designs into their vehicles. For example, recessed grab bars increase EMS and passenger safety in the working area of the ambulance.
- AEV designs their electrical systems with **simplicity** in mind. You won't need a computer or engineering degree to work on your ambulance's electrical system.
- **Save thousands** of dollars and receive your ambulance quickly by choosing one of the AEV standard layouts not requiring in-depth custom work. Orders are typically filled within 120 days!

## Premier Service

- We provide **full service**, from assistance in designing the perfect vehicle for your operation, to full support after the sale.
- We specialize in helping our customers develop **vehicle replacement programs**, designed to rotate vehicles in and out of the fleet to get the most value from your budget.
- You can count on a **timely response**. We will respond to your repair and replacement needs in days, not weeks. And sometimes even hours.
- We will send a trained technician to service your ambulance **on site**.
- If we need to bring your ambulance back to our facility for repair, we will provide you with a **loaner vehicle**.
